

Physicians Wanting to Refer Patients for Consult

Please fax your referral letter to 705-467-0702 with all relevant imaging reports and any consult notes from other specialists involved in the patients care regarding current complaint.

Our goal is to notify you of the patients appointment time within one week after we receive all information required.

Please refer only: Shoulders, Knees, Elbows, Wrists (including carpal tunnel syndrome), Hips, Any fractures, Uncomplicated foot/ankle issues, and Uncomplicated hand issues.

We do not see: Neck or Spine issues, Complex hand or feet issues.

Please note: all referrals pertaining to knee and hip OA should be referred to the RVH arthroplasty intake clinic. Request Collingwood and Dr. Olivia Cheng in order for patient's to come to our clinic (if preferred). Referrals can be faxed to 705-792-3329. Please include all pertinent imaging.

Please ensure your patients bring all x-ray images for Dr. Cheng to review. Dr. Cheng will compare x-ray images to MRI reports that your offices provide (if applicable) to determine treatment. Currently we only have access to the Collingwood General & Marine Hospital x-rays and Georgian Radiology.

Our new office does not have an x-ray department on site – patients who do not arrive with their x-rays could risk having their appointments rescheduled to a later date when their images will be available.
